## TECHNICAL SKILLS

- Frontend Development: JavaScript, React.js
- Backend Development: Node.js, Express.js
- Databases: MongoDB, MySQL
- Styling Tools: SCSS, Tailwind CSS
- Programming Languages: Java, Python

## PROJECTS

### Notification and Timetable Management System

Collaborated in a group to develop a desktop application using Java Swing for the frontend and MySQL as the database.

Enabled professors to update notifications and modify the timetable dynamically.

### Check-in: Room and Villa Booking Platform [Website](#)

Developed a platform for users to host and book rooms or villas.

Built the backend with Node.js and Express.js for routing and APIs.

Created a dynamic frontend with React.js, focusing on interactivity and responsiveness.

Used MongoDB for data storage and Mongoose for efficient database management.

### Job Hub – Job Portal Website

Developed a full-stack job portal platform enabling companies to post jobs and manage applicants, while users can apply for jobs by uploading resumes.

Built dynamic frontend using Vite + React.js with Tailwind CSS for responsiveness and clean UI.

Implemented backend with Node.js and Express.js, using MongoDB for data storage. Created features to add companies, create job listings, view applicant details, and access uploaded resumes.

Followed component-based architecture and RESTful API standards for scalable and maintainable development.
